Good morning Ms. Rao,

This is Richard Kozuma. In thinking back on our conversation a few days ago, I believe I told you that the structure at issue was a two-story structure, in answering your inquiry regarding a refrigerator. The structure is more of an elevated structure, with the bottom section walled-off on two sides, with corrugated metal sheeting. The refrigerator is set in this "open" section of the structure. I just want to make certain that I give you the correct information.

Thank you again for helping me address the matter at issue.

Richard Kozuma
